

# Attackers Are Everywhere. With Managed Threat Complete, So Are You.

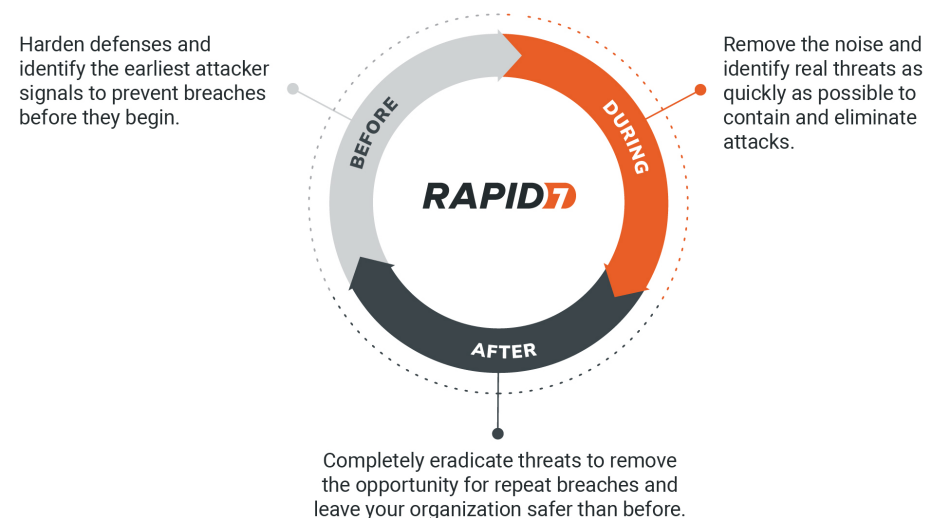

The world of cybercrime is full of complexity. Environments are diverse and sprawling, there are a record number of CVEs keeping organizations scrambling to keep up, and the impact of ransomware grows wider and wider with each incident. In 2023, we saw a record number of zero-day vulnerabilities being exploited by ransomware groups<sup>1</sup>, a trend that will continue into 2024.

Unifying the management of your organization's attack surface with your detection and response program is the key to effective Managed Detection and Response (MDR) in modern environments. By building a holistic program, your team is empowered to take command at every stage of an attack—understanding and remediating risk before an attack can happen, detecting and eradicating a threat quickly when a breach does occur, remediating fully after a breach and learning from it to make your program more hardened against advanced attack vectors.

With Rapid7 Managed Threat Complete, you have round the clock monitoring, triage, investigation and hunts. You have command of your attack surface by understanding what risk should be remediated first, and a team of experts on your side should a breach occur. It's the most complete MDR on the market.

## A new, complete approach to MDR

Managed Threat Complete brings security teams a comprehensive view into the kill chain - bringing the ability to anticipate and remediate risk, pinpoint signals of attacker behavior in every corner of your environment, and act to contain threats with speed and accuracy. And if there's a breach, you'll have unlimited digital forensics and incident response.

Rapid7 Blog - What 2023 cyber threats told us about 2024

## Key Outcomes

- **Leave attackers nowhere to hide** with a combination of SIEM, XDR, VRM, threat intelligence, DFIR, and proactive threat hunting.
- **Achieve 3x Faster MTTD & MTTR** - shut down intruder behavior, solve skills gap challenges, and reduce risk to business continuity.
- **Elevate your efficacy** with one tool: complete visibility, only the alerts that matter, and comprehensive reporting and remediation.
- **Extend your team instantly** with an elite global SOC, DFIR experts, malware analysts, threat hunters, and strategic advisors by your side.

## Reduce risks and eliminate threats.

MDR isn't just about detection and response. It's about strengthening your security posture so you're ready for whatever comes next. Shrink your attack surface and stay ahead of emerging threats by unlocking the combined power of leading risk management and MDR with a single managed service designed for maximum security.

## Coverage everywhere you need it.

Trust that your entire attack surface is under control. Our team has full coverage across your endpoints, network, users and the cloud with our XDR technology – powered by Rapid7's proprietary Threat Intelligence and Detection Engine. And with unlimited data ingestion and 13 months of storage, we'll be able to see every attacker movement across your environment and dig deep into investigations.

## Detection and response without limits.

Partner with the only MDR to offer unlimited, end-to-end digital forensics and incident response - regardless of size, complexity, or investigation hours. Our SOC experts work with you to ensure we've left your environment better than we found it with clear guidance to eliminate threats and reduce future risk.

## Tailored program for security leadership & ransomware coverage.

Managed Threat Complete is purpose built to deliver comprehensive visibility and coverage over your internal and external environment, with leading technology and expert guidance to keep you covered from elusive, headline-making ransomware, known and unknown risk, and deep DFIR capabilities.

### About Rapid7

Rapid7 is creating a more secure digital future for all by helping organizations strengthen their security programs in the face of accelerating digital transformation. Our portfolio of best-in-class solutions empowers security professionals to manage risk and eliminate threats across the entire threat landscape from apps to the cloud to traditional infrastructure to the dark web. We foster open source communities and cutting-edge research—using these insights to optimize our products and arm the global security community with the latest in attacker methodology. Trusted by more than 11,000 customers worldwide, our industry-leading solutions and services help businesses stay ahead of attackers, ahead of the competition, and future-ready for what's next.

**When a recent zero-day threat emerged, the Rapid7 team notified us about it the night before. The next day we saw it on the news, and thought, 'This is what we're paying for—a team of experts who contain incidents so we can sleep easy at night.'**
